Workshop Description

This workshop will provide a forum for sharing experiences of earthquake and tsunami early warning in Europe and Japan, building a foundation for the development of next-generation early warning systems in both regions.

The workshop will feature expert speakers that will present on state-of-the-art early warning research activities in both regions. Each presentation will be followed by a short discussion on strategies that can be used to enhance the engineering- and socio-economic-related aspects of earthquake and tsunami early warning.

Intended Audience

Academic and industrial affiliates with interdisciplinary technical and practical knowledge/interest/experience in earthquake and tsunami early warning.
